

# INTERNATIONAL PETROLEUM CONFERENCE ON ADVANCED TECHNOLOGIES IN OIL EXPLORATION AND PRODUCTION

## ABSTRACT

The Oil & Gas industry has demonstrated remarkable application of technology to successfully find, locate, drill, complete and produce hydrocarbons. Advances in seismic technology, drilling and completion practices and innovative reservoir management strategies have allowed multi-nationals and IOCs to meet the growing world demands.

The Catholic University of Angola, with the support of Chevron and the Society of Petroleum Engineers-SPE Talent Council Angola section, wants through this meeting to have the opportunity to be the venue where researchers and engineers in the oil industry can share their work concerning the new technologies for Oil Exploration and Production.

### DATES

14 – 15 March 2016

### VENUE

Skyna Hotel  
Avenida de Portugal, n°29,  
Luanda, Angola

### SPECIAL GUEST

Eng. Botelho de Vasconcelos  
National Minister of Petroleum
